

To Whom It May Concern:

My name is Robert Sparks. In January, 1982 I had a successful removal of a spot of cancer in my prostate. My health seemed to be fine and I met "Forever Living Products" in August of 1983. I began drinking the "juice" around the first of November, 1983. I drank about six to eight ounces a day. Around this time I had a complete physical from my family physician. A month later my doctor called and said I needed to see a urologist. I made the appointment and my wife and I went to see him. He informed us that the cancer was active again. His only solution was major surgery immediately. First of all another blood test was taken to verify the activity. I "doubled up on the "juice" and also began large quantities of the bee pollen and propolis. The week we waited for the blood tests was very long and tense. Finally one evening the urologist called me and said there was no active cancer. I told him the only thing different in my life was drinking the aloe vera juice. He said he couldn't say that this had anything to do with the test results but to keep it up as he also drank the "juice". One month later a second test was taken which also turned out negative. I feel that "Forever Living Aloe Vera Juice" has given me a new lease on life.

Sincerely,

Robert J. Sparks
