March 28th, 1986

I, Kuljeet Kaila, have had many physical problems in the last two years. I have lost over 17 pounds and have had 6 kidney infections. One day my chemistry lab instructor, Mr. Klimpel, asked me into his office and asked me what was wrong. I explained my situation. He recommended that I try some Aloe Vera, and to drink about an ounce of it every day. Ever since I started to drink the Aloe Vera, I have not been sick and my Doctor is very impressed with the fact that there is no bacteria present in my urine sample (when usually there was always a reading of 0.2 or more bacteria present).

Aloe Vera has really worked for me, I have gained weight and look and feel much healthier! I would recommend this product to everyone. Even if you're a healthy person, this product will still help you. Now that my health is doing well, I wouldn't mind getting into the business myself. All I can say is that this product has helped me make it through this year at university! Thanks to Aloe Vera!

Sincerely
